

PART I

Clinical Evaluation

- 1 General Aspects of the Patient's Neurologic History
- 2 Neurologic Examination of the Older Child
- 3 Neurologic Examination of Young Children (Age 1–5 Years)
- 4 Neurologic Examination of Infants (Age 0–1 Year)
- 5 Motor Signs
- 6 Vision Loss
- 7 Hearing Impairment
- 8 Vertigo
- 9 Taste and Smell
- 10 Neuropsychological Assessment

PART II

Care of the Child With Neurologic Disorders

- 11 Counseling Children With Neurologic Disorders and Their Families
- 12 Pediatric Neurorehabilitation Medicine
- 13 Pediatric Palliative Care, Pain, and Symptom Management
- 14 Practical Bioethics in Child Neurology
- 15 Transitional Care for Children With Neurologic Disorders
- 16 Practice Guidelines in Pediatric Neurology
- 17 Measurement of Health Outcomes in Pediatric Neurologic Disorders
- 18 Computer Resources, Artificial Intelligence, and Telemedicine
- 19 Education and Training of Child Neurologists and Workforce Issues

PART III

Neurodiagnostic Testing

- 20 Cerebrospinal Fluid Examination
- 21 Pediatric Neuroimaging
- 22 Pediatric Neurophysiologic Evaluation

PART IV

Global Child Neurology

- 23 Regional and Global Implications for Children's Brain Health
- 24 Implementing Child Neurology Care in Resource-Limited Settings
- 25 Adaptation and Implementation of Guidelines at the Local Level

PART V

Neonatal Neurology

- 26 Neonatal Neuro-Intensive Care
- 27 Provoked Neonatal Seizures and Neonatal Onset Epilepsy
- 28 Hypoxic-Ischemic Brain Injury in the Term Newborn
- 29 Cerebrovascular Disorders in the Newborn
- 30 Neonatal Nervous System Trauma
- 31 Injury to the Developing Preterm Brain: Intraventricular Hemorrhage and White Matter Injury
- 32 Perinatal Metabolic Encephalopathies

PART VI

Environment and Brain Development

- 33 The Neural Exposome and Environmental Neuroscience
- 34 Adverse Childhood Experiences
- 35 The Neurological Impact of Prenatal Substance Exposure
- 36 Environmental Pollutants
- 37 Malnutrition, Nutrition, and Dietary Toxins
- 38 Poisoning and Drug-Induced Neurologic Diseases

PART VII

Congenital Structural Defects

- 39 Introduction to Human Brain Malformations
- 40 Disorders of Neural Tube Development
- 41 Disorders of Forebrain Development
- 42 Disorders of Cerebellar and Brainstem Development
- 43 Microcephaly and Megalencephaly: Disorders of Brain Size
- 44 Malformations of Cortical Development
- 45 Hydrocephalus, Cysts, and Cystic Malformations
- 46 Congenital Anomalies of the Skull
- 47 Prenatal Diagnosis of Structural Brain Anomalies

PART VIII

Neurogenetics

- 48 Neurogenetics in the Genome Era
- 49 Genetic Counseling in the Genomic Era
- 50 Chromosomes and Chromosomal Abnormalities
- 51 Single-Gene Abnormalities
- 52 Neurocutaneous Disorders
- 53 Emerging Gene-Based Pathways: Channelopathies (Epilepsy and Beyond)

- 54 Emerging Gene-Based Pathways:
mTORopathies
- 55 Emerging Gene-Based Pathways:
RASopathies
- 56 Emerging Gene-Based Pathways: Chromatin
Remodeling Disorders
- 57 The Neuronal Ceroid Lipofuscinoses

PART IX

Metabolic Disorders

- 58 Approach to the Patient With a Metabolic
Disorder
- 59 Aminoacidemias and Organic Acidemias
- 60 Urea Cycle Disorders
- 61 Diseases Associated With Primary
Abnormalities in Carbohydrate
Metabolism
- 62 Disorders of Glycosylation
- 63 Lysosomal Storage Diseases
- 64 Mitochondrial Diseases
- 65 Peroxisomal Disorders
- 66 Neurotransmitter-Related Disorders
- 67 Disorders of Vitamin Metabolism

PART X

Neurodevelopmental Disorders

- 68 Neurodevelopmental Disabilities: Conceptual
Framework
- 69 Intellectual Developmental Disorder and
Global Developmental Delay
- 70 Regressive and Degenerative Genetic
Neurological Disorders
- 71 Developmental Encephalopathies
- 72 Developmental Language Disorders
- 73 Nonverbal Learning Disorders
- 74 Dyslexia
- 75 Attention-Deficit/Hyperactivity
Disorder
- 76 Autism Spectrum Disorder
- 77 Cerebral Palsy
- 78 Developmental Coordination Disorder
- 79 Treatment of Neurodevelopmental
Disorders
- 80 Neuropsychopharmacology

PART XI

Epilepsy

- 81 Overview of Seizures and Epilepsy in
Children
- 82 Principles of Management and Outcome
- 83 Pathophysiology of Seizures and Epilepsy

- 84 Epilepsy Genetics
- 85 Febrile Seizures
- 86 Generalized Seizures
- 87 Focal and Multifocal Seizures
- 88 Myoclonic Seizures
- 89 Infantile Epileptic Spasms Syndrome
- 90 Status Epilepticus
- 91 Electroclinical Syndromes: Neonatal Onset
- 92 Electroclinical Syndromes: Infantile Onset
- 93 Electroclinical Syndromes: Childhood Onset
- 94 Electroclinical Syndromes: Adolescent Onset
- 95 Focal Structural Epilepsy
- 96 Acquired Epilepsies: Trauma, Stroke, and Tumors
- 97 Inherited Metabolic Epilepsies
- 98 Antiseizure Medication Therapy in Children
- 99 Epilepsy Surgery in the Pediatric Population
- 100 Neuromodulation in Epilepsy
- 101 Ketogenic Diets
- 102 Behavioral, Cognitive, and Social Implications of Childhood Epilepsy
- 103 Mortality in Children With Epilepsy

PART XII

Nonepileptiform Paroxysmal Disorders

- 104 Headache in Children and Adolescents
- 105 Breath-Holding Spells and Reflex Anoxic Seizures
- 106 Psychogenic Nonepileptic Seizures and Psychiatric Disorders
- 107 Functional Neurological Symptom Disorder in Children and Adolescents
- 108 Syncope and Postural Orthostatic Tachycardia Syndrome
- 109 Brief Resolved Unexplained Events, Apparent Life-Threatening Events, and Sudden Infant Death Syndrome

PART XIII

Disorders of Sleep

- 110 Restless Legs Syndrome and Periodic Limb Movement Disorder in Children and Adolescents
- 111 Nocturnal Paroxysmal Disorders
- 112 Disorders of Excessive Sleepiness

PART XIV

- Disorders of Balance and Movement

- 113 The Cerebellum and the Hereditary Ataxias
- 114 Movement Disorders: An Overview
- 115 Paroxysmal Dyskinesias
- 116 Movement Disorders of Infancy
- 117 Drug-Induced Movement Disorders in Children
- 118 Tics and Tourette Syndrome

PART XV

White Matter Disorders

- 119 Genetic and Metabolic Disorders of the White Matter
- 120 Acquired Disorders Affecting the White Matter

PART XVI

Brain Injury and Disorders of Consciousness

- 121 Impairment of Consciousness and Coma
- 122 Traumatic Brain Injury in Children
- 123 Abusive Head Trauma
- 124 Hypoxic-Ischemic Encephalopathy in Infants and Older Children
- 125 Disorders of Intracranial Pressure
- 126 Spinal Cord Injury
- 127 Determination of Brain Death/Death by Neurologic Criteria in Infants and Children

PART XVII

Cerebrovascular Disease in Children

- 128 Arterial Ischemic Stroke in Infants and Children
- 129 Sinovenous Thrombosis
- 130 Vascular Malformations, Intracerebral Hemorrhage, and Subarachnoid Hemorrhage in Infants and Children
- 131 Cerebral Arteriopathies
- 132 Coagulation Disorders and Cerebrovascular Disease in Children

PART XVIII

Infections of the Nervous System

- 133 Bacterial Infections of the Nervous System
- 134 Viral Infections of the Nervous System
- 135 Fungal, Rickettsial, and Parasitic Diseases of the Nervous System
- 136 Neurologic Complications of Immunization

PART XIX

Immune-Mediated Disorders of the Nervous System

- 137 Diagnosis and Management of Pediatric Neuroimmunological Disorders
- 138 Autoimmune Encephalitis
- 139 Autoimmune-Associated Epilepsies
- 140 Sydenham Chorea, Pediatric Autoimmune Neuropsychiatric Disorders Associated With Streptococcus, and Pediatric Acute Neuropsychiatric Syndrome
- 141 Immune-Mediated Cerebellar Disorders
- 142 Neurorheumatology

PART XX

Pediatric Neuro-Oncology

- 143 Pediatric Neuro-Oncology: An Overview
- 144 Medulloblastoma
- 145 Other Embryonal and Pineal Malignancies of the Central Nervous System
- 146 Ependymoma
- 147 Pediatric-Type Diffuse High-Grade Glioma
- 148 Pediatric Low-Grade Glioma
- 149 Diffuse Intrinsic Pontine Glioma and Diffuse Midline Glioma
- 150 Atypical Teratoid/Rhabdoid Tumors
- 151 Central Nervous System Germ Cell Tumors
- 152 Craniopharyngiomas, Meningiomas, and Schwannomas
- 153 Pediatric Intradural Spinal Cord Tumors
- 154 Systemic Cancers and Central Nervous System Involvement
- 155 Treatment-Related Neurologic Sequelae of Pediatric Central Nervous System Tumors

PART XXI

Neuromuscular Disorders

- 156 Muscle and Nerve Development in Health and Disease
- 157 Diagnostic Testing in Children With Suspected Neuromuscular Disorders
- 158 Clinical Assessment of Pediatric Neuromuscular Disorders
- 159 The Floppy Infant
- 160 Classic Proximal Spinal Muscular Atrophy
- 161 Other Motor Neuron Diseases of Childhood
- 162 Genetic Peripheral Neuropathies
- 163 Acquired Peripheral Neuropathies
- 164 Inflammatory Neuropathies

165 Congenital Myasthenic Syndromes
166 Acquired Disorders of the Neuromuscular
Junction
167 Duchenne and Becker Muscular
Dystrophy
168 Congenital, Limb-Girdle, and Other Muscular
Dystrophies
169 Congenital Myopathies
170 Metabolic Myopathies
171 Inflammatory Myopathies
172 Channelopathies: Myotonic Disorders
and Periodic Paralysis
173 Multidisciplinary Management of Children
With Neuromuscular Conditions

PART XXII

Systemic and Autonomic Nervous System Diseases

174 Endocrine Disorders of the Hypothalamus and
Pituitary in Childhood and Adolescence
175 Disorders of the Autonomic Nervous
System: Autonomic Dysfunction in Pediatric
Practice
176 Disorders of Micturition and Defecation
177 Neurologic Disorders in Children With
Heart Disease
178 Neurologic Disorders Associated With Renal
Diseases
179 Neurologic Manifestations and Disorders
Associated With Gastrointestinal Diseases
